

SimplySNAP Remote Access (SSRA)

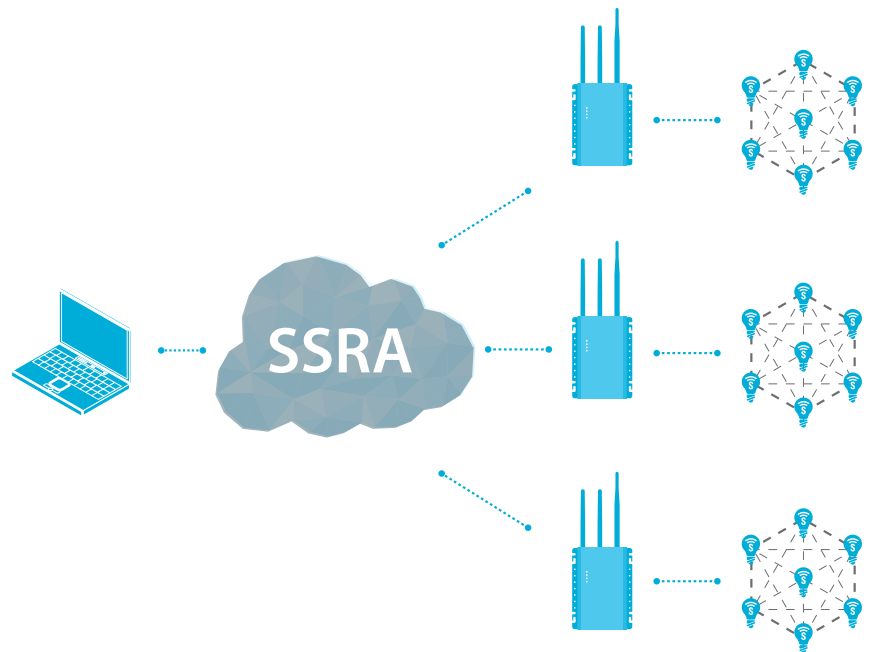

The Gateway to Smart Everything, Everywhere

SimplySNAP Remote Access (SSRA) allows secure, remote, administrative access to a SimplySNAP site controller. To be accessible via SSRA, each SimplySNAP site controller must be connected to the Internet*.

Once connected, SSRA makes it easy to manage remote SimplySNAP site-controllers, eliminating the need for advanced configuration from IT personnel. In other words, **no complex VPN setup or port forwarding is required to be configured on the user's network equipment.**

SSRA allows you to access multiple SimplySnap installations from a single log-in. When you log-in to SSRA, you can choose which site and which gateway at that site that you want to manage.

Once a site controller is selected, users will be able to access the SimplySNAP interface for that site controller as if they had browsed directly to it.

SSRA Part Number	Description
SSRA-1YR	SSRA Setup and 1 Year Subscription and renewal
SSRA-5YR	SSRA Setup and 5 Year Subscription and renewal
SSRA-SVC-1YR-L1	SSRA Monthly Maintenance Fee; OEM Account; 1-year term (Level 1, up to 25 Managed Site Controllers)
SSRA-SVC-1YR-L2	SSRA Monthly Maintenance Fee; OEM Account; 1-year term (Level 2, up to 50 Managed Site Controllers)
SSRA-SVC-1YR-L3	SSRA Monthly Maintenance Fee; OEM Account; 1-year term (Level 3, up to 100 Managed Site Controllers)

* Ethernet or Cellular

** Access to SSRA via the cellular modem in an SS450 requires cellular service activation with Verizon Wireless, which is not included with an SSRA purchase.
